IMPORTANT SAFETY INSTRUCTIONS

When using an electrical appliance, basic safety precautions should always be followed, including the following:
Read all instructions before using this appliance.

DANGER – To reduce the risk of electric shock:
1. An appliance should never be left unattended when plugged in. Always unplug this sewing machine from the electric outlet immediately after using and before cleaning.
2. Always unplug before replacing a sewing machine bulb. Replace bulb with same type rated 12 V, 5 Watts.

WARNING – To reduce the risk of burns, fire, electric shock or injury to persons:
1. Do not allow to be used as a toy. Close attention is necessary when this sewing machine is used by or near children.
2. Use this appliance only for its intended use as described in this instruction book.
   Use only attachments recommended by the manufacturer as contained in this instruction book.
3. Never operate this sewing machine if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into water.
   Return this sewing machine to the nearest authorized dealer or service center for examination, repair, electrical or mechanical adjustment.
4. Never operate the appliance with any air opening blocked. Keep ventilation openings of this sewing machine and foot controller free from accumulation of lint, dust and loose cloth.
5. Never drop or insert any object into any opening.
6. Do not use outdoors.
7. Do not operate where aerosol (spray) products are being used or where oxygen is being administered.
8. To disconnect, turn all controls to the off (“O”) position, then remove plug from outlet.
9. Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.
10. Keep fingers away from all moving parts. Special care is required around the sewing machine needle.
11. Always use the proper needle plate. The wrong plate can cause the needle to break.
12. Do not use bent needles.
13. Do not pull or push fabric while stitching. It may deflect the needle causing it to break.
14. Switch this sewing machine off (“O”) when making any adjustment in the needle area, such as threading the needle, changing the needle, threading the bobbin, changing the presser foot, and the like.
15. Always unplug this sewing machine from the electrical outlet when removing covers, lubricating, or when making any other adjustments mentioned in this instruction book.

Name of Parts

1. Foot pressure dial
2. Thread guide
3. Retractable thread guide
4. Bobbin winder spindle
5. Bobbin winder stopper
6. Speed control slider
7. Stitch length display
8. * Thread cutter button
9. Reverse stitch lever
10. Bobbin winding button
11. Up/Down needle button
12. Knee lifter socket
13. Thread tension dial
14. Hook cover
15. Hook cover plate
16. Needle plate
17. Thread cutter
18. Face cover
19. Foot pressure indicator
20. Thread take-up lever
21. ** Needle threader
22. Needle clamp screw
23. Needle
24. Screw holes for attachments
25. Presser foot
26. Feed dog
27. Setscrew
28. Carrying handle
29. Presser foot lifter
30. Spool pins
31. Machine sockets
32. Power switch
33. Stitch length adjustment dial
34. Handwheel
35. Foot control
36. Power supply cord

* Model 1600P and 1600-DBX only
** Model 1600P only
To Attach Knee Lifter

The knee lifter is extremely helpful when sewing applique, patchwork and quilting since it allows you to handle the fabric while your knee controls the presser foot.

Match the ribs on the knee lifter with the notches in the knee lifter socket and insert the knee lifter.

1. Knee lifter
2. Ribs
3. Notches

Push the knee lifter with your knee to raise and lower the presser foot.

NOTE:
Do not touch the knee lifter while sewing, otherwise the fabric will not be fed smoothly.
Connecting Machine to Power Supply

CAUTION
Always turn the power switch off and unplug the sewing machine from the electrical outlet when the machine is not in use.

1. Machine plug
2. Machine socket for power supply plug
3. Power supply plug
4. Outlet
5. Machine socket for foot control
6. Foot control plug
7. Foot control

Turn off the power switch.
Insert the foot control plug 6 into the machine socket 5.
Insert the machine plug 1 into the machine socket 2.
Insert the power supply plug 3 into the wall outlet 4.
Turn on the power switch 8.

Controlling Sewing Speed

Speed control slider
Sewing speed can be varied with the speed control slider according to your sewing needs.
To increase sewing speed, slide it to the right.
To decrease sewing speed, slide it to the left.

Foot control
Sewing speed is varied by the foot control.
The harder you press down on the foot control, the faster the machine runs.

The machine runs at the maximum speed set by the speed control slider when the foot control is being fully depressed.

Operating Instructions:
The symbol "O" on a switch indicates the "off" position of a switch.
For appliances with a polarized plug (one blade wider than the other): To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If it does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not modify the plug in any way.
* Foot control model TJC-005 is used with sewing machine model 1600P.
Up/Down Needle Position Button

Press this button to bring the needle bar up or down. The RED LED will light up when the needle is down. The GREEN LED will light up when the needle is up.
The machine will stop with the needle up or down depending on the needle position determined by this button.
The machine will always stop with the needle up after auto thread cutting or buttonhole sewing.

Bobbin Winding Button

Press this button to wind the bobbin.
The LED will light up when you shift the bobbin winding stopper toward the bobbin and press this button.
The LED signal will turn off after bobbin winding is finished.

Thread Cutter Button
*Model 1600P and 1600-DBX only

Pressing this button after sewing will trim the threads.
You can continue sewing without pulling the bobbin thread up after trimming the threads.

* Use the thread cutter on the face cover if the thread is thicker than #30.

* The foot control and Up/down needle position button cannot be used while the machine is trimming the threads.

Stitch Length Adjustment Dial

You can adjust the stitch length from 0 to 6 mm by turning this dial. The stitch length will be show on the stitch length display

Reverse Stitch Lever

The machine will sew in reverse while the reverse stitch lever is pressed down. The machine will sew forward if the lever is released.
Use the lever to lock the beginning and end of seams.
Presser Foot Lifter

- Presser foot lifter
- Normal up position
- Highest position

The presser foot lifter raises and lowers the presser foot. You can raise it higher than the normal up position to help you place thick material under the foot.

Foot Pressure Dial

- Foot pressure dial
- Setting indicator

The foot pressure control dial should be set at “3” for regular sewing. Reduce the pressure for appliqué, sewing on fine synthetics and elastic fabrics. Set the dial at “1” when sewing extra fine fabrics.

NOTE:
Do not reduce the foot pressure lower than “0”.

Attaching and Detaching Presser Foot

- Setscrew

To change the presser foot, raise the presser foot lifter. Loosen the setscrew, choose the proper foot and insert it from the bottom. Tighten the setscrew with the large screwdriver to secure the foot.
To Remove Bobbin Case and Bobbin

1. Raise the needle and presser foot. Remove the hook cover plate ① and open the hook cover ②.
2. Pull open the latch ③ of the bobbin case ④. Take the bobbin case straight out of the hook.

• To remove the bobbin from the bobbin case:
  Release the latch, then drop the bobbin ⑤ out of the bobbin case as illustrated.
  * Only use this exclusive bobbin for model 1600P.

CAUTION
Turn the power switch off and unplug the sewing machine from the electrical outlet

Setting the Spool of Thread

1. Spool of thread
2. Spool pin
3. Spool cap

• Setting a spool of thread:
  Place a spool of thread ① on the spool pin ② with the thread coming off the spool as shown. Attach the spool cap ③, and press it firmly against the spool of thread.

4. Spool holder
5. Net

• Setting the thread cone:
  Place the spool holder ④ on the spool pin, then place the thread cone on the spool holder. Cover the thread cone with the net ⑤ if the spool thread is shaky when sewing.
Winding a Bobbin

1. Pass the thread through the guide on the thread guide bar ① from behind.

2. Pass the thread under the bobbin winding tension disk ②.

3. Thread through the hole ③ in the bobbin from the inside to the outside. Match the notch ④ with the spring ⑤ on the bobbin winder spindle. Then insert the bobbin on the bobbin winder spindle ⑥.

4. Push the bobbin winder stopper to the left ⑦.

5. Hold the free end of the thread in your hand and press the bobbin winding button ⑧. Press the bobbin winding button again to stop the bobbin when it has made several turns, and cut the thread close to the hole in the bobbin.

6. Press the bobbin winding button again. When the bobbin is fully wound, the machine will stop automatically. Return the bobbin winder stopper to its original position. Cut the thread with a scissors. Remove the bobbin from the bobbin winder spindle.

NOTE: This machine has an exclusive motor for bobbin winding, which allows you to wind a bobbin while stitching.
Inserting a Bobbin

1. Place a bobbin in the bobbin case making sure the thread winds clockwise on the bobbin as illustrated.

2. Draw the thread through the slit 1 of the bobbin case.

3. Continue to draw the thread under the tension spring 2 and through the opening 3. Pull out about 4” (10 cm) of thread. The bobbin should spin clockwise when the thread is pulled out of the bobbin case.

Inserting the Bobbin Case into the Hook

1. Holding the latch 1 open, position the bobbin case into the hook aligning the slot 2 with the rib 3. The bobbin case should lock into place when the latch is released.

2. Close the hook cover 4 and attach the hook cover plate 5 in this order.

1 Latch
2 Slot
3 Rib
4 Hook cover
5 Hook cover plate
Thread the Needle Thread

* Use only left twist thread

1. Raise the presser foot lifter. Press the Up/Down needle button twice to raise the needle to its highest position. Turn the power switch off. Set a spool of thread on the spool pin. Pass the thread through the guide on the thread guide bar 1 from the behind.

2. Pass the thread through the thread guide plate 2, then draw the thread between the pre-tension disks 3 under the pre-tension dial 4.
   * If the thread flutters around while sewing, pass the thread through three holes in the guide plate as illustrated in fig.(A).
   * The standard setting of the pre-tension dial is that the screw head 5 sinks about 4 mm (1/8˝ to 3/16˝) 6.

3. Holding the thread with both hands, draw the thread down and around the tension dial 7 from right to left. Pull the thread up to insert it between the tension disks 9 and pass it over the tail of the check spring. Then pull the thread down over the loop of the check spring 8.

4. Draw the thread through the thread guide 10, 11 and eye of the thread take-up lever 12. Pass the thread through the thread guide 11 again. Holding the thread with both hands, slip the thread into the thread guide 13 as shown.

5. Draw the thread down to the needle bar thread guide 14, then pass the thread through the needle 15.
   For model 1600P, use the built-in needle threader (see page 11).
1. Lower the presser foot. Press the Up/Down needle button twice to raise the needle to its highest position. Turn the power switch off. Push down the needle threader knob ① as far as it will go.

2. Turn the knob ① in the direction of the arrow to insert the hook into the needle eye. The hook ④ comes out through the needle eye as illustrated.

3. Holding the thread with both hands, draw the thread along the thread path ②. Then hook the thread around the guide ③.

4. Draw the thread under the hook ④. Hold the end of thread with your hand while pulling up the thread lightly in the direction of arrow.

5. Turn the knob in the direction of the arrow as shown, drawing the thread loop ⑤ through the needle. Release the threader knob slowly. Then pull the thread loop ⑤ to the right.

The needle threader may not work well with these combinations.

</tbody>
</table>
**Drawing up the Bobbin Thread**

1. Hold the needle thread lightly with your left hand.

2. Turn the switch on. Press the Up/Down needle position button twice to pick up the bobbin thread. Pull the needle thread to bring up a loop of bobbin thread.

3. Slide 10 cm (4”) of both threads to the rear under the presser foot.
Changing the Needle for Model 1600P

CAUTION
Turn the power switch off and unplug the machine before changing the needle.

Turn the power switch off. Lower the presser foot. Turn the needle clamp screw \( \text{1} \) counterclockwise with the large screwdriver. Loosen the screw and remove the needle from the needle clamp.

\( \text{1} \) Needle clamp screw

Insert a new needle into the needle clamp \( \text{2} \) with the flat side \( \text{3} \) to the right, pushing it up as far as it will go. Tighten the clamp screw \( \text{1} \) firmly.

\( \text{2} \) Needle clamp
\( \text{3} \) Flat side

* Use an HL x 5 needle

To Check the Needle

To determine if the needle is defective, place the flat side of the needle on something flat (a needle plate, piece of glass, etc.). The gap between the needle and the flat surface should be consistent.

Never use a blunt or blunt needle, as it may cause skipped stitches or thread breakage. Defective needles can ruin the fabric. Always purchase good quality needles. Change needles often.

Balancing Needle Thread Tension

The needle thread and bobbin thread should interlock in the center of two layers of the fabric in straight seams.

Adjusting Bobbin Thread Tension

Test the bobbin thread tension by holding the end of the bobbin thread and suspending the bobbin case as illustrated. Then jerk the bobbin case once by flicking your wrist.

If the thread comes out of the bobbin case continuously, and the bobbin case keeps falling, the bobbin thread tension is too loose.
Make a slight adjustment by turning the screw clockwise with the small screwdriver.
① To tighten

If the thread does not come out of the bobbin case at all, the bobbin thread tension is too tight.
Make a slight adjustment by turning the screw counterclockwise with the small screwdriver.
② To loosen

Adjusting Needle Thread Tension

Needle thread tension is too tight:
If the bobbin thread ④ shows through on the right side of the fabric ① and it feels bumpy, loosen the needle thread tension by turning the dial to the left.
① Right side of the fabric
② Wrong side of the fabric
③ Needle thread
④ Bobbin thread

Needle thread tension is too loose:
If the needle thread ③ loops on the wrong side of the fabric ②, tighten the needle thread tension by turning the dial to the right.
Before you start sewing your garment, try test stitching with the same thread and fabric as your garment.

1. Turn the stitch length adjustment dial to adjust the stitch length.
   Slide the needle and bobbin threads to the back under the presser foot. Use the same fabric for actual sewing.

2. Turn the handwheel toward you to lower the needle into the fabric.

3. Set the speed control slider to (slow) until you get used to the sewing speed.
   Lower the presser foot lifter. Press the foot control to start sewing.

4. Check the sewing result and adjust the needle thread tension as necessary.

5. Press the auto thread cutter button to trim the threads for model 1600P and 1600P-DBX.
   You can continue sewing without pulling the bobbin thread up to the needle plate after trimming the threads.

* Use the thread cutter on the face cover if:
  – the sewing machine is model 1600P-DB.
  – the thread is thicker than #30.
Securing a Seam

- By reverse stitching

The machine will sew in reverse as long as the reverse stitch lever is pressed. Secure the beginning and end of a seam by sewing in reverse for about 1 cm (3/8").

- By knotting the threads

Pull the bobbin thread to bring the needle thread to the wrong side of fabric. Tie the threads together. Trim the remaining threads.

Turning a Square Corner

Stop the machine a few stitches before the end of the seam. Press the up/down needle button a few times until the needle falls on the end of the seam.

Raise the presser foot.

Pivot the fabric around the needle to change the sewing direction. Lower the presser foot and start sewing in a new direction.
Using the Cloth Guide

Attach the cloth guide to the needle plate with the screw ①. Adjust the position of the cloth guide ② and tighten the screw ①.

Place the fabric with its edge ③ against the cloth guide and sew.

Rolled Hem

Attach the hemmer foot ② to the presser foot bar. Tighten the setscrew ① using the large screwdriver.

① Setscrew ② Rolled hem

Fold the edge of the fabric twice, 6 cm (2 3/8") in length and 0.3 cm (1/8") in width. Trim the corner 0.5 cm (3/16") ④ by 0.8 cm (1/4") ⑤ for easier insertion of the hem into the foot.

③ Wrong side of the fabric ④ 0.5 cm (3/16") ⑤ 0.8 cm (1/4") ⑥ Curl of the foot

Position the fabric aligning the edge of hem with the curl of the foot ⑥. Lower the foot and sew 1–2 cm (1/2"–1") while pulling both threads to the back. Stop the machine and lower the needle into the fabric. Raise the foot and insert the folded portion of the fabric into the curl of the foot.

Lower the foot, and then sew while lifting up the edge of the fabric to keep it feeding smoothly and evenly.
CARE & MAINTENANCE

Cleaning the Hook and Feed Dog

CAUTION:
Turn the power switch off and unplug the machine before cleaning.

1. Remove the needle and presser foot.
2. Remove the hook cover plate 1 and open the hook cover 2.
3. Loosen the setscrew 3 and remove the needle plate 4.
4. Clean the hook 5 and feed dog 6 with a lint brush 7.
5. After cleaning the machine, attach the needle plate 4, needle and presser foot.

1. Hook cover plate
2. Hook cover
3. Setscrew
4. Needle plate
5. Hook
6. Feed dog
7. Lint brush

Oiling the Machine

NOTE:
Unplug the machine before oiling.

Oil the points as shown (1, 2, and 3) with two or three drops of oil. Use only sewing machine oil MO-70 for this sewing machine.

Oil the machine once a day if you use the machine frequently.

Use a soft, dry cloth to remove excess oil.

Remove the bobbin case from the hook when you oil the hook race.

After oiling, stitch a piece of waste fabric to absorb excess oil.
Replacing the Light Bulb

**CAUTION:**
Turn the power off before replacing the light bulb. The bulb could be HOT, wait until it has cooled down before touching it.

1. Setscrew
2. Face cover
3. Lamp socket
4. Light bulb

**To remove:**
Remove the setscrew 1.
Remove the face cover 2.
Pull out the bulb 4 from the lamp socket 3.

**To replace:**
Insert a new bulb into the opening of the socket 3.
Attach the face cover 2 with the setscrew and cap.

Replace the bulb with the same type, rated 12 V, 5 W.

Replacing the Light Bulb on the Underside of the Sewing Arm

Lay the machine on its back.

Detach the lamp window 1 from the machine with the screw driver as shown.
Pull out the light bulb 3 from the socket.

Insert a new bulb into the socket 2.
Attach the lamp window 1 into the opening on the machine.
1. Lamp window
2. Lamp socket
3. Light bulb

Replace the bulb with the same type, rated 12 V, 5 W.
