1/4" Seam Foot (without guide)

For Horizontal Rotary Hook 7 / 5mm Stitch Width Models

Part No.: 202529002

The 1/4" Seam Foot without the guide is an incredibly versatile tool for various piecing projects. Similar to the standard 1/4" seam foot, it allows you to achieve precise 1/4" seams by aligning your fabric with the edge of the presser foot. The wider surface of the foot ensures stable fabric feeding. Constructed from durable metal, this foot offers strength and reliability.

POINT 1 No Guide Plate

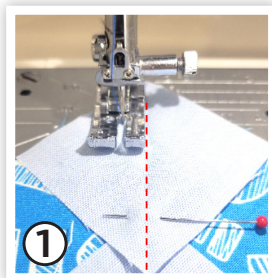

You can sew smoothly without the guide catching on overlapping seam allowances during piecing.

The seam allowance can get caught in the guide.

POINT 2 1/4" Guide & Markings

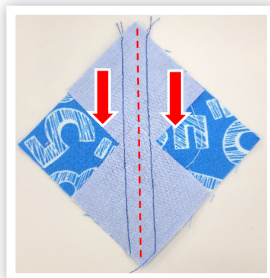

The foot features a 1/4" guide and precise markings from the needle drop position, as shown on the right-hand side. These markings are helpful for achieving accurate 1/4" seam allowances.

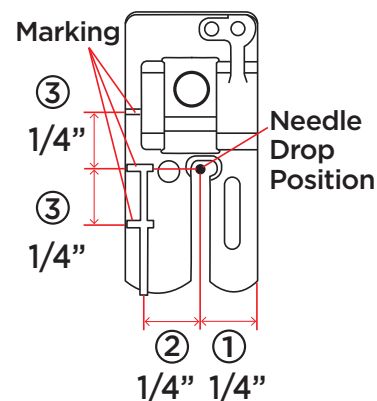

Align the edge of the foot with the mark and sew.

Align the 1/4" guideline with the mark and sew. The raised guideline makes it easy to accurately position and align with the mark for precise stitching.

Sewing from the same direction helps keep the fabric flatter and more even throughout the process.

③ You can accurately measure a 1/4" seam without needing a washable marker, making this foot perfect for fine piecing projects like the Lemoyne Star.

Because you can sew two lines from the same direction using the guide, the fabric stays flat, ensuring consistent and excellent results every time. This feature is especially useful for projects like Flying Geese or Half Square Triangle piecing!
